360 DEGREE CLOUD TECHNOLOGIES PVT. LTD.

Table of Contents

1. Owner-Based Signature Parsing (New Functionality)	3
2. Restrict Composing (Improvement)	3
3. Link Tracking (Bug Fix)	3

Release Notes- 1.246.6

The latest patch version of 1.246, which is patch 1.246.6 includes the following updates:

1) Owner-Based Signature Parsing (New Functionality)

The signature text will now be chosen or extracted based on the signature of the record owner rather than the signature of the current user.

Limitations:

- This functionality depends on the organization-wide general signature setting, which must be enabled to use this feature.
- This functionality will not work in the case of speed boosting and cross-object automation.

2) Restrict Composing (Improvement)

The Restrict Composing functionality will now also work on the SMS Composing Utility.

3) Link Tracking (Bug Fix)

We have fixed the issue where the count value would not display on the SMS thread in the Conversation View when a customer didn't click on a link. It will now show a count of zero.

Version Name 1.246.6
